Re: Equitable, Life-Saving Care for People with Disabilities in Alabama during the COVID-19 Pandemic

Dear Governor Ivey:

Thank you for your leadership during this COVID-19 crisis.

We write on behalf of the Alabama Disabilities Advocacy Program (ADAP), which represents and serves the 17% of Alabamians who have disabilities, and organizations and agencies that have endorsed this letter.

We appreciate the swiftness with which the state of Alabama withdrew its prior Ventilator Treatment Guidance that excluded certain categories of people with disabilities from receiving life-saving ventilators should ventilator rationing become necessary in Alabama.

We have reviewed the State's [Crisis Standards of Care Guidelines \(CSC\)](#) dated February 20, 2020, which replaced the Ventilator Treatment Guidance, according to the Alabama Department of Public Health. Although we appreciate the general language in the CSC directing that the allocation of health care in a crisis must be provided in a non-discriminatory manner, there is no mention of ventilator triage in the CSC. Accordingly, we have several serious concerns that we believe must be addressed immediately, given that the COVID-19 virus could soon lead to the rationing of ventilators and other medical staff, equipment, and supplies.

We strongly urge that the Crisis Standards of Care specifically include the following to ensure that people with disabilities have equal access to life-saving treatment and that medical rationing is not based on disability or other categories prohibited by law. We also urge that the CSC be made mandatory, and not just advisory, for all healthcare facilities in the state.

1. Healthcare decisions will not be based upon race, gender, ethnicity, disability, age, sexual orientation, gender identity, immigration status, incarceration status, homelessness, socio-economic status, ability to pay, perceived quality of life, perceived social worth, or past or future use of resources.
2. There will be no exclusion criteria based on a particular disability. Decisions about how treatment should be allocated must be made based on individualized determinations, using current objective medical evidence. Individualized assessments must not be based on assumptions about a person's pre-existing condition or diagnosis, or the average life expectancy for people with such a pre-existing condition (i.e. HIV/AIDS, cancer, diabetes) or diagnosis.
3. Health care allocation decisions will not be based on age, "life years," life expectancy, or prognosis beyond short-term survival.
4. Decisions will not be made based on disabilities or underlying conditions unless:
 - (a) There is a clinically definitive terminal diagnosis and the individual meets hospice guidelines.
 - (b) There is a clinically definitive diagnosis that makes it highly unlikely that the person could survive the coronavirus.

5. Necessary accommodations will be provided to assist persons with communication, mobility, or other conditions to effectively participate in healthcare treatment decisions.
6. Reasonable modifications will be made to any standardized scoring instruments, like the SOFA or FAST, in order to accommodate specific disabilities or conditions.
7. Restoration criteria will only look at restoration to baseline. The fact that someone will need to use medical or social resources after discharge cannot be a factor in decision-making if the person needed those resources prior to the acute treatment.
8. No one who uses a ventilator on a regular basis (not related to COVID-19) will have their ventilator confiscated. Anyone already on a ventilator who is hospitalized for any other reason will be treated and the use of a ventilator will not reduce their triage score (someone already living on a ventilator may actually have greater survivability).

We look forward to working with your administration, the Alabama Department of Public Health, and other stakeholders to ensure that the State's guidance to healthcare personnel and facilities lives up to the State's commitment to protect ALL of Alabama's citizens.

Sincerely,

James Tucker, Director
Alabama Disabilities Advocacy Program
